

I have known about K-LOVE in my area for nearly a year. I enjoy the variety of music played on the station as well as the contests and encouraging words given. The station is one that I am proud to allow my children hear. I have seen other local stations of this type fall away because of lack of funding.

I believe that another program different than the programming will eliminate the positive messages and music offered by K-LOVE. There is really very few truly positive stations in our area. While there are many other stations in our area, we do not have much choice in listening. Either the theme of the music is too foul or too bland for my family to enjoy.

Providing an encouraging message to the community there is the opportunity for someone to see hope through their mountain of despair. Music is a very powerful medium and providing good music with thoughtful lyrics empowers adults and children alike to do good not evil.
